

Futura *Double-Radius Edge*

Futura is a contemporary, seamless double-radius edge that emulates the “slab” effect of solid surfaces and stone. Bold, yet refined, Futura creates an attractive focal point in applications such as kitchens and baths.

Futura Double-Radius Edge

The future is beyond flat. Experience VT Dimensions.

The Futura double-radius edge profile adds dimensional beauty and character to VT Dimensions countertops. More than just a flat surface, VT Dimensions bring everything together into one seamless and contoured offering—with the depth, the style, and seamless edge you want.

Experience a whole new dimension in countertops with VT Dimensions.
